“Alexa, open Metronome Pro” “play a beat at Andante for 1 minute” “play at 40 beats per minute for 30 seconds”

Description

Metronome Pro is the best metronome for Alexa. We've updated the basic metronome with more interesting functions to enable you to practice music on your terms, without ever leaving your instrument.

We've focused on delivering an amazing experience, including understanding common tempo markings such as Andante or Allegro for you classical music fans, as well as creating "custom sequences" for heavy metal players.

When you purchase custom sequences, you can create automatically have Metronome Pro increase the tempo to practice licks or passages at increasing speeds. Frequently, practicing involves playing a certain passage slowly, then increasing the tempo over time. Custom sequences does this for you without getting up from your chair.

For example, you can play:
80 bpm for 30s
90 bpm for 30s
100 bpm for 30s
120 bpm for 30s
150 bpm for 30s
All in one sequence that you can name.

So go ahead, get your beat and practice on!

Hea Eyes

This product is amazing! I bought the body massager as well as the Heaeyes. This eye massager with heat is exactly what I have needed! I've suffered from migraines and sinus headaches since I was a child, I'm 70 now. I am so thankful for this product. It's perfect for me and my needs! It feels to me as though my entire face is being treated. I love it! Thank you for developing this incredible product!
